HAVER & BOECKER

AUSTRALIA

The Economies of Granulation

From the mine through to end product distribution – Your HAVER & BOECKER expert will not only examine the principles of agglomeration but the complete supply chain including Processing, Storage, Mixing, Filling, Packing, Palletising and Loading.

The agglomeration of powder is a potential way to facilitate transportation and economic use of material. The main objective of agglomeration is to convert fine-grained materials into larger products. These products exhibit considerably improved properties in transport, processing and use.

We will discuss up-to-date approaches to the granulation process of minerals in the aggregate, fertiliser, metals and recycling industry – and we won't stop with the bulk!

Meeting your requirements will be the focus of our "Lunch & Learn".

SCARABAEUS 1000 producing limestone pellets in Freiberg, Germany

What is "Lunch & Learn"?

HAVER & BOECKER brings years of experience in developing and manufacturing of processing and packing technology to your table through Experience, Exchange and Education.

What does that mean for you?

EXPERIENCE

First, let's start with lunch. We will come to your working environment with delicious food to nourish your brain and body.

EXCHANGE

This is not a "we talk, you listen" event. Learning is all about exchanging information and ideas, and we will design our session to encourage open dialogue throughout the session.

EDUCATION

Lunch & Learn features an expert from within the HAVER & BOECKER company, who will share knowledge and experience with your team and inform you about recent developments and the latest market trends of the industry.

THIS TIME:

DIPL.-ING. JAN PAUL LAMPKE

Jan holds a diploma in mining machinery and brings over 10 years of mineral processing experience, collected in R&D, commissioning and process management to the Lunch & Learn table.

What do we need from you?

Simply confirm the time and venue for your HAVER & BOECKER Lunch & Learn with Larissa. We will send you an invitation that you can share with your team – up to 20 people. We will take care of your lunch. Please let us know if there are any special dietary requirements.
